Technical Skills

Frontend / Fullstack: Nuxt 4, Vue 3, TypeScript, JavaScript, Nuxt UI, AG Grid, Dockview, Firebase
Programming: Python, C++
Tools & Ecosystem: Linux, Git, Pinia, Vite, Vitest, Cloudflare (Pages, Workers), NuxtHub, Netlify, Alpaca API

Experience

Co-founder & CTO, LamaTrader June 2025 – Present
lamatrader.com

- AI-native trading workspace on Alpaca, live on the Alpaca Connect Marketplace.
- Lead the frontend: trading interface and order entry for stocks, options and crypto.
- Built real-time AG Grid tables for positions, orders and market data, and a drag-and-drop Dockview widget workspace.
- Built the UI for the AI Strategy Builder and backtesting. 2,600+ commits since joining.

Web Developer, Optimax Software June 2023 – Present
optimaxsoftware.com

- Built multiple production websites and web apps using Vue 3, Nuxt 4, Pinia, and TypeScript.
- Implemented responsive, component-based interfaces with SSR and efficient state management.
- Integrated REST APIs and dynamic content for 5k+ monthly users.
- Optimised performance, SEO, and accessibility across projects.

Web Developer, 57Colleges June 2022 – August 2023
57colleges.com

- Developed and optimised responsive web apps using WordPress, HTML, CSS, JavaScript, and Bootstrap.
- Implemented full-stack solutions with ASP.NET Core MVC for secure dynamic content.
- Collaborated with cross-functional teams to deliver projects on time and improve user engagement.

Projects

Built at Optimax Software:

Visual Quran — Data Visualisation Platform | *Nuxt 4, Vue 3, TypeScript, UnoCSS, Chart.js, Unovis, anime.js*

- Interactive Quran visualisation platform presenting charts, maps, and network graphs.
- Leveraged structured datasets and Quran Meta API for scalable data insights.
- Implemented SEO optimisation, automated testing (Vitest), and type-safe schema validation (Zod).

Cinoteka — Movie Library Platform | *Nuxt 4, TypeScript, Pinia, Drizzle ORM, Cloudflare Pages*

- Full-stack movie collection web app with authentication.
- Built metadata matching, duplicate detection, and privacy-first design for local media files.
- Deployed to Cloudflare Pages with secure state management and persistent user data.

Sozler.im — Quote Sharing Platform | *Vue 3, TypeScript, UnoCSS*

- Responsive quote-sharing platform with scalable component architecture.
- Collaborated on feature development and performance optimisation for enhanced UX.

Other Projects:

Dr. Andrews Plastic Surgery — Simulation Tool | *Nuxt 4, Vue 3, UnoCSS, Firebase*

- Freelance: full-stack website and patient simulation tool for a plastic surgery practice in Iowa, delivered remotely in two weeks.
- Implemented real-time visualisations, improving patient engagement and workflow.

Post-App — Social Networking Application | *Vue 3, Firebase, UnoCSS*

- Full-stack social networking application with real-time updates and dynamic content.

- Integrated secure user authentication and intuitive UI components for better engagement.

Vagif Guliyev's Website — Personal Portfolio | *Nuxt 4, Vue 3, Nuxt Content CMS*

- Dynamic personal portfolio website with responsive design and SEO optimisations.
- Showcases projects and interactive features for personal branding.

Testimonials

My LinkedIn Recommendations:

- *"To work with Ali for our Iowa plastic surgery practice has been an absolute game-changer. We needed a robust full-stack website that would articulate all of our services and offer a safe and convenient way for our patients to engage with them. Ali did all this and much more within just two weeks!..."*

  — Aidan Andrews, MS Computer Science Candidate, Entrepreneur and Researcher at UIUC

Certifications

IELTS – Overall Band Score: 7.0 (Speaking 8.0) British Council, 2025
